Dairy

Milk, curd, buttermilk, lassi and other dairy products.

Typical formats

Printed films, laminated films and pre-made pouches.

Food

Spices, flour, paneer, rusk, grains, snacks, bakery products and ready-to-cook foods.

Typical formats

Laminated films, pre-made pouches and shrink films.

Beverages & Liquids

Water, juices, arrack, edible oils and other liquid products.

Typical formats

Printed films and pre-made pouches.

What we make.

Films, rolls and pouches made for the way your product is packed.

LDPE Films

Unprinted low-density polyethylene (LDPE) film in clear and opaque options, supplied in rolls.

Printed Films

Custom-printed film rolls for milk and liquid sachets, including water, lassi, juices and arrack.

Laminated Films

Bonded film layers for ghee, spices and other food packs, selected for the product and filling conditions.

Structure and finish matched to the application.

Pre-Made Pouches

Pre-made pouches for your product and filling process.

Seal configurations: Top Seal; Centre Seal; Three-Side Seal; Bottom Seal.

Shrink Films, Wrappers & Liners

Shrink film for multipacks; separate wrappers and polyethylene liners for seafood, cartons, drums and protective packing.

Agricultural Films & Covers

Mulch film, fertiliser covers and nursery pouches for cultivation, crop inputs and plant propagation.

FINISH OPTIONS

Also available in different finishes: Clear, opaque, matte and metallised.

NEED SOMETHING ELSE?

Cannot find the format you need? Contact us and we will help you find the right next step.

From granules to finished pouches.

Our manufacturing capabilities cover extrusion, printing, lamination and converting.

Printing

Nine-colour rotogravure printing, alongside eight-colour and other multicolour printing capabilities.

WHAT THIS STAGE ENABLES

Custom-printed rolls for milk and liquid sachets, food packs and other printed flexible packaging.

Extrusion

Monolayer and multilayer extrusion for a range of flexible film structures.

Lamination

Film-to-film bonding to produce multilayer packaging laminates, supported by multiple laminating machines.

Converting

A range of slitting, pouching, sealing and punching machines converts films into rolls and finished packs.

Let's discuss your packaging.

Tell us what you pack, or start with an existing sample. Enquiries welcome from across India and overseas.

Before you enquire

Not sure which film or pouch you need?

Start with what you are packing and how it is filled. A photograph of your current pack can help explain the requirement. Share it in WhatsApp or attach it to your email.

What about minimum orders and lead times?

Ask us to confirm the minimum run and timing for your chosen format and quantity. Include your required delivery date so these can be discussed with the quotation.

Enquiring from outside India?

Include the destination country and any documentation or packing requirements. Supply arrangements, delivery and suitability need to be confirmed for your enquiry.

What information helps with a quotation?

Include the product, pack format or existing sample, approximate quantity and delivery location. Add the material, size, filling method and artwork if you have them. You can leave unknown details for the discussion.

How do artwork and printing costs work?

Tell us whether you have existing artwork or need a new print. Ask for any artwork, printing-cylinder or other setup charges to be identified in your quotation.

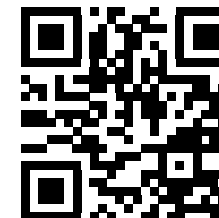

Your product. Your brand. Our
packaging.
